

Qualification and experience for eligibility for examinership in BDS examination

1. M.D.S. Degree from a recognised Institution.
2. Four years teaching experience in the subject in a dental college after MDS
3. Should be holding the post of a Reader or above in a Dental Institution approved/recognised by the Dental Council of India for B.D.S.

Note:

1. In case of Public Health Dentistry, as there is an acute shortage of teachers one examiner from Public Health Dentistry and the second from Periodontics is permissible. To be reviewed after three years.
2. In case of Physiology and Biochemistry if Internal examiner is from Physiology, External examiner should be from Biochemistry or vice versa
3. In case of Pathology and Microbiology if Internal examiner is from Pathology, External examiner should be from Microbiology or vice versa
4. In case of Dental Materials, if Internal is from Prosthodontics, external should be from Conservative Dentistry and vice versa

Fifty percent of Examiners appointed shall be external from Dental Institutions approved/recognised by the Dental Council of India for B.D.S. Course, from another University, preferably outside the State.

Reciprocal arrangement of Examiners should be discouraged, in that, the Internal Examiner in a subject should not accept external examinership for a College from which External Examiner is appointed in his subject for the corresponding period.

No person shall be an External Examiner to the same University for more than 3 consecutive years. However, if there is a break of one year the person can be re-appointed.

"Minimum Physical Requirement and Minimum Staffing Pattern (as per DCI Regulations 2006)."

GOALS AND OBJECTIVES**GOALS:**

The dental graduates during training in the institutions should acquire adequate knowledge, necessary skills and reasonable attitudes which are required for carrying out all activities appropriate to general dental practice involving prevention, diagnosis and treatment of anomalies and diseases of the teeth, mouth, jaws and associated tissues. The graduate also should understand the concept of community oral health education and be able to participate in the rural health care delivery programmes existing in the country.

OBJECTIVES:

The objectives are dealt under three headings (a) Knowledge and Understanding (b) Skills and (c) Attitudes.

(A) KNOWLEDGE AND UNDERSTANDING:

The graduate should acquire the following during the period of training.

1. Adequate knowledge of the scientific foundations on which dentistry is based and good understanding of various relevant scientific methods, principles of biological functions; ability to evaluate and analyse scientifically various established facts and data.
2. Adequate knowledge of the development, structure and function of the teeth, mouth and jaws and associated tissues both in health and disease and their relationship and effect on general state of health and also bearing on physical and social well being of the patient.
3. Adequate knowledge of clinical disciplines and methods which provide a coherent picture of anomalies, lesions and diseases of the teeth, mouth and jaws and preventive diagnostic and therapeutic aspects of dentistry.
4. Adequate clinical experience required for general dental practice.

Principal
Sharavathi Dental College & Hospital
T.H. Road, Alkela, Shimoga

Principal
Sharavathi Dental College & Hospital
Shivamogga - 205.

5. Adequate knowledge of the constitution, biological function and behaviour of persons in health and sickness as well as the influence of the natural and social environment on the state of health in so far as it affect dentistry.

(B) SKILLS:

A graduate should be able to demonstrate the following skills necessary for practice of dentistry.

1. Diagnose and manage various common dental problems encountered in general dental practice keeping in mind the expectations and the right of the society to receive the best possible treatment available wherever possible.
2. Prevent and manage complications if encountered while carrying out various surgical and other procedures.
3. Carry out certain investigative procedures and ability to interpret laboratory findings.
4. Promote oral health and help prevent oral diseases where possible.
5. Control pain and anxiety among the patients during dental treatment.

(C) ATTITUDES:

A graduate should develop during the training period the following attitudes.

1. Willingness to apply the current knowledge of dentistry in the best interest of the patient and community.
2. Maintain a high standard of professional ethics and conduct and apply these in all aspects of professional life.
3. Seek to improve awareness and provide possible solutions for oral health problems and needs throughout the community.
4. Willingness to participate in the CPED Programmes to update knowledge and professional skill from time to time.
5. Help and participate in the implementation of the national oral health policy.

RECOMMENDATIONS**GENERAL:**

1. The undergraduate course involves organisation of teaching programmes year-wise. However, this course, as a whole, should demonstrate integration of the basic sciences, clinical dentistry and practical or the laboratory skills. The course should be designed and integrated in such a way to permit smooth progression from the pre-clinical to clinical phase. Collaboration should be encouraged between teachers of basic sciences, dental sciences and clinical subjects.
2. The undergraduate dental course consists of three main components. The first component consists subjects common to medicine and dentistry like anatomy, physiology, biochemistry and behavioural science, leading to pharmacology, pathology, microbiology and then on to general medicine and general surgery. The second component runs concurrently with the first and deals with special aspects of oral and dental tissues, oral biology and oral pathology. Finally, the third component based on the foundations of the first two, deals with the clinical and technical aspects of dentistry as is required for general dental practice.
3. The first component of the course is intended to provide initially, an appreciation of normal human structure, development, function and behaviour, leading to understanding of the diseases, its prevention and treatment. The main objective is to provide the student a broad knowledge of the normal structures and functions of the body, the alterations which take place in disease with particular reference to those conditions in which medical and dental co-operation is essential for proper management. At this stage, the student should also be made aware of the social and psychological aspects of patient care with special reference to the relationship between dentist and patient. The behavioural sciences including both sociology and psychology should be introduced at the initial stages of the training programme, much before the students actually deal with the patients.
4. The second component of dental undergraduate programme consists instruction in the subjects dealing with dental and oral aspects to ensure a detailed knowledge of the structure and function of the dental and oral tissues. This enables the student to diagnose, prevent and treat the dental and oral diseases and disorders which were not included in the first component. The subject of oral biology is to be introduced at this level to provide the students a comprehensive knowledge and application of oral

Principal
 Sharavathi Dental College & Hospital
 T. Road, Aikola, Shimoga

Principal
 Sharavathi Dental College & Hospital
 Shivamogga-577 205:

12. Infection and cross infection control assume significance in dental practice. The students should be made aware of the potential risk of transmission in the dental surgery, various infectious diseases particularly HIV and hepatitis. The students should be aware of their professional responsibility for the protection of the patients, themselves and their staff and the requirements of the health and safety regulations.
13. In recent times, the subjects of aesthetic dentistry, oral implantology, behavioural sciences and forensic odontology have assumed great significance. Hence, the Council recommends that these four specialities should be incorporated into the undergraduate curriculum. The instruction and clinical training in aesthetic dentistry shall be carried out by the departments of Conservative, Endodontics & Aesthetic Dentistry and prosthodontics, Crown Bridge, Aesthetic Dentistry and Oral Implantology. Similarly, the instruction and clinical training in oral implantology shall be done by the departments of Oral & Maxillofacial Surgery, Prosthodontics, Crown Bridge, Aesthetic Dentistry and Oral Implantology and Periodontology and Oral Implantology. The instruction in behavioural sciences should ideally commence before the students come in contact with the patients and shall be carried out by the departments of Public Health Dentistry & Preventive Dentistry and Paedodontics & Preventive Dentistry. Forensic Odontology will be a part of Oral Pathology & Oral Microbiology and Oral Medicine and Radiology.

COMPETENCIES

At the completion of the undergraduate training programme the graduates shall be competent in the following.-

General Skills

- Apply knowledge & skills in day to day practice
- Apply principles of ethics
- Analyse the outcome of treatment
- Evaluate the scientific literature and information to decide the treatment
- Participate and involve in professional bodies
- Self assessment & willingness to update the knowledge & skills from time to time
- Involvement in simple research projects
- Minimum computer proficiency to enhance knowledge and skills
- Refer patients for consultation and specialised treatment
- Basic study of forensic odontology and geriatric dental problems

Practice Management

- Evaluate practice location, population dynamics & reimbursement mechanism
- Co-ordinate & supervise the activities of allied dental health personnel
- Maintain all records
- Implement & monitor infection control and environmental safety programs
- Practice within the scope of one's competence

Communication & Community Resources

- Assess patients goals, values and concerns to establish rapport and guide patient care
- Able to communicate freely, orally and in writing with all concerned
- Participate in improving the oral health of the individuals through community activities.

Patient Care - Diagnosis

- Obtaining patient's history in a methodical way
- Performing thorough clinical examination
- Selection and interpretation of clinical, radiological and other diagnostic information
- Obtaining appropriate consultation
- Arriving at provisional, differential and final diagnosis

Patient Care - Treatment Planning

- Integrate multiple disciplines into an individual comprehensive sequence treatment plan using diagnostic and prognostic information
- Ability to order appropriate investigations

Principal
Sharavathi Dental College & Hospital
T H Road, Alkola, Shimoga

Principal
Sharavathi Dental College & Hospital
Shivamogga-577 205.

✓ Patient Care - Treatment

Recognition and initial management of medical emergencies that may occur during dental treatment
 Perform basic cardiac life support
 Management of pain including post operative
 Administration of all forms of local anaesthesia
 Administration of intra muscular and venous injections
 Prescription of drugs, pre operative, prophylactic and therapeutic requirements
 Uncomplicated extraction of teeth
 Transalveolar extractions and removal of simple impacted teeth
 Minor oral surgical procedures
 Management of oro-facial infections.
 Simple orthodontic appliance therapy
 Taking, processing and interpretation of various types of intra oral radiographs
 Various kinds of restorative procedures using different materials available
 Simple endodontic procedures
 Removable and fixed prosthodontics
 Various kinds of periodontal therapy

✓ ORAL MEDICINE & RADIOLOGY

- Able to identify precancerous and cancerous lesions of the oral cavity and refer to the concerned speciality for their management
- Should have an adequate knowledge about common laboratory investigations and interpretation of their results.
- Should have adequate knowledge about medical complications that can arise while treating systemically compromised patients and take prior precautions/ consent from the concerned medical specialist.
- Have adequate knowledge about radiation health hazards, radiation safety and protection.
- Competent to take intra-oral radiographs and interpret the radiographic findings
- Gain adequate knowledge of various extra-oral radiographic procedures, TMJ radiography and sialography.
- Be aware of the importance of intra- and extra-oral radiographs in forensic identification and age estimation
- Should be familiar with jurisprudence, ethics and understand the significance of dental records with respect to law

✓ PAEDIATRIC & PREVENTIVE DENTISTRY

- Able to instill a positive attitude and behaviour in children towards oral health and understand the principles of prevention and preventive dentistry right from birth to adolescence.
- Able to guide and counsel the guardian/parents with regard to various treatment modalities including different facets of preventive dentistry.
- Able to treat dental diseases occurring in the child patient.
- Able to manage t physically and mentally challenged/disabled children effectively and efficiently, tailored to the needs of individual requirement and conditions.

✓ ORTHODONTICS & DENTOFACIAL ORTHOPAEDICS

- Understand about normal growth and development of facial skeleton and dentition.
- Pinpoint aberrations in growth process both dental and skeletal and plan necessary treatment
- Diagnose the various categories of malocclusion
- Able to motivate and explain to the patient (and parent or guardian) about the necessity of treatment
- Plan and execute preventive orthodontics (space maintainers or space regainers)
- Plan and execute interceptive orthodontics (habit breaking appliances)
- Manage treatment of simple malocclusion such as anterior spacing using removable appliances
- Handle delivery and activation of removable orthodontic appliances

[Signature]
Principal
 Sharavathi Dental College & Hospital
 T.H. Road, Aikola, Shimoga

[Signature]
Principal

Sharavathi Dental College & Hospital
 Shivamogga-577 205.

- ✓ Diagnose and appropriately refer patients with complex malocclusion to the specialist

PERIODONTOLOGY

- ✓ Diagnose the patients periodontal problem, plan and perform appropriate periodontal treatment
- ✓ Competent to educate and motivate the patient
- ✓ Competent to perform thorough oral prophylaxis, subgingival scaling, root planning and minor periodontal surgical procedures
- ✓ Give proper post treatment instructions and do periodic recall and evaluation
- ✓ Familiar with concepts of osseointegration and basic surgical aspects of implantology

PROSTHODONTICS AND CROWN & BRIDGE

- ✓ Able to understand and use various dental materials
- ✓ Competent to carry out treatment of conventional complete and partial removable dentures and fabricate fixed partial dentures
- ✓ Able to carry out treatment of routine prosthodontic procedures.
- ✓ Familiar with the concept of osseointegration and the value of implant-supported Prosthodontic procedures

CONSERVATIVE DENTISTRY AND ENDODONTICS

- ✓ Competent to diagnose all carious lesions
- ✓ Competent to perform Class I and Class II cavities and their restoration with amalgam
- ✓ Restore class V and Class III cavities with glass ionomer cement
- ✓ Able to diagnose and appropriately treat pulpally involved teeth (pulp capping procedures)
- ✓ Able to perform RCT for anterior teeth
- ✓ Competent to carry out small composite restorations
- ✓ Understand the principles of aesthetic dental procedures

ORAL & MAXILLOFACIAL SURGERY

- ✓ Able to apply the knowledge gained in the basic medical and clinical subjects in the management of patients with surgical problems
- ✓ Able to diagnose, manage and treat patients with basic oral surgical problems
- ✓ Have a broad knowledge of maxillofacial surgery and oral implantology
- ✓ Should be familiar with legal, ethical and moral issues pertaining to the patient care and communication skills
- ✓ Should have acquired the skill to examine any patient with an oral surgical problem in an orderly manner
- ✓ Understand and practice the basic principles of asepsis and sterilisation
- ✓ Should be competent in the extraction of the teeth under both local and general anaesthesia
- ✓ Competent to carry out certain minor oral surgical procedure under LA like trans-alveolar extraction, frenectomy, dento alveolar procedures, simple impaction, biopsy, etc.
- ✓ Competent to assess, prevent and manage common complications that arise during and after minor oral surgery
- ✓ Able to provide primary care and manage medical emergencies in the dental office
- ✓ Familiar with the management of major oral surgical problems and principles involved in in-patient management

PUBLIC HEALTH DENTISTRY

- ✓ Apply the principles of health promotion and disease prevention
- ✓ Have knowledge of the organisation and provision of health care in community and in the hospital service
- ✓ Have knowledge of the prevalence of common dental conditions in India.
- ✓ Have knowledge of community based preventive measures
- ✓ Have knowledge of the social, cultural and environmental factors which contribute to health or illness.
- ✓ Administer oral hygiene instructions, topical fluoride therapy and fissure sealing.
- ✓ Educate patients about the aetiology and prevention of oral disease and encourage them to assure responsibility for their oral health.

BANGALORE, KARNATAKA.

LEARNING OUTCOMES

The learning outcomes and graduate attributes are stated by the apex authorities that is, DCI and RGUHS in the form of aims and objectives of the programme. These only are considered as the learning outcomes expected from the graduates moving out of the Institution.

Aims:

The dental graduates during training in the institutions should acquire adequate knowledge, necessary skills and such attitudes which are required for carrying out all the activities appropriate to general dental practice involving the prevention, diagnosis and treatment of anomalies and diseases of the teeth, mouth, jaws and associated tissues. The graduate should also understand the concept of community oral health education and be able to participate in the rural health care delivery programs existing in the country

Objectives:

The objectives are dealt under three headings namely (a) knowledge and understanding (b) skills and (c) attitudes includes

a. Knowledge includes the scientific foundations on which dentistry is based, principles of biological functions and ability to evaluate and analyse scientifically various established facts and data.

b. Skills includes ability to diagnose and manage various common dental problems, acquire skill to prevent and manage complications. if encountered, skill to carry out required investigative procedures and ability to interpret laboratory findings, oral health and help to prevent oral diseases wherever possible. A graduate should be able to demonstrate the following skills necessary for practice of dentistry, able to diagnose and manage various common dental problems encountered in general dental practice, keeping in mind the expectations and the right of the society to receive the best possible treatment available wherever possible

Principal
Sharavathi Dental College & Hospital
Shivamogga-577 205.

C. Attitudes: During the training period the graduates should develop the-

1. Willing to apply current knowledge of dentistry in the best interest of the patients and the community
2. Maintain a high standard of professional ethics and conduct and apply these in all aspects of professional life
3. Seek to improve awareness and provide possible solutions for oral health problems and needs throughout the community
4. Willingness to participate in the continuing education programmes to update knowledge and professional skills from time to time.
5. To help and to participate in the implementation of national health programmes

Therefore, the learning outcomes listed as the knowledge, skills and attitudes expected to be learnt and trained during the course of graduation. The Institution displays this information to the students by giving a weblink to the RGUHS weblink in the Institution's website. The teachers are also communicated through the institution website about the instructions by the Head of the Institution.

Methodology – Computation of COS and POS

The Institution has a stated mechanism of its own for the assessment of learning outcomes and graduate attributes stated as per the guidelines of DCI & RGUHS, for the BDS course. The mechanism includes-

1. Statement of Aims and Objectives
2. Computation methodology
3. Analysis of the data

• Statement of Aims and Objectives

Aims and objectives of BDS course as per the revised ordinance of RGUHS governing Bachelor of Dental Surgery (BDS) degree course 2011 are as under:

Principal
Sharavathi Dental College & Hospital
Shivamogga-577 203.

Aims

The dental graduates during training in the institutions should acquire adequate knowledge, necessary skills and such attitudes which are required for carrying out all the activities appropriate to general dental practice involving the prevention, diagnosis and treatment of anomalies and diseases of the teeth, mouth, jaws and associated tissues. The graduate should also understand the concept of community oral health education and be able to participate in the rural health care delivery programs existing in the country

- **Objectives**

The objectives are dealt under three headings namely (i) knowledge and understanding (ii) skills and (iii) attitudes.

- **Attitudes**

A graduate should develop during the training period the following attitudes

1. Willing to apply current knowledge of dentistry in the best interest of the patients and the community
2. Maintain a high standard of professional ethics and conduct and apply these in all aspects of professional life
3. Seek to improve awareness and provide possible solutions for oral health problems and needs throughout the community
4. . Willingness to participate in the continuing education programmes to update knowledge and professional skills from time to time.
5. To help and to participate in the implementation of national health programme

- **Computation methodology**

For the purpose of assessment of learning outcomes and graduate attributes as per the provisions of DCI and RGUHS, the Institution has designed the following mechanism

Step1: For the 2016 batch of BDS students, all the four years examination results are consolidated. Each subject is denoted by Course Outcome (CO). All the subjects are considered

as courses and numbered from CO1.....to CO_n. Each CO includes marks assigned and secured all the students in a particular subject. It includes marks in theory, practicals/clinicals, internal assessments and viva voce.

Step2: Consolidation of results from I BDS to IV BDS can be stated as $C1+C2+C3+\dots+Cn = \sum Cn$

Step3: Computation of Program Outcomes (PO's)

PO's= $C1/N+C2/N+C3/N+\dots+Cn/N = \sum Cn/N$ where, N= Number of students

- **Analysis of the data**

Analysis for the batch of 1st BDS for the year 2016-17 who were 25 in number graduated in the year 2020-21. Their total assigned weights calculated as per the details enclosed, is 85400. Whereas the attained total weight was 62969. That is 73.73% therefore, the attainment rate is 74%.

For the batch of 2017-18 1st MDS, who were 13 in number graduated in the year 2020-21, their total assigned weights calculated as per the details enclosed, is 9035. Whereas the attained total weight was 6392. That is 70.07% therefore, the attainment rate is 71%.
